

Accessibility Review

- axe-core version 4.10.3
- Extension version 4.115.1
- Product axe-devtools-html (extension-chrome)

Automated scan result: 0 violations detected by axe (Critical: 0, Serious: 0, Moderate: 0, Minor: 0).

PROS

- No automated violations detected at the time of testing (great baseline).
- Single-column structure with clear reading order works well for screen readers in email clients.
- Descriptive alternative text on key images and meaningful link/button names improve announcements.
- Call to action uses sufficient color contrast (purple on white) and large touch target area.

CONS

- Background images may not render in some Outlook versions; ensure content remains readable without them.
- Automated tools cannot verify logical focus order or announcements in all webmail environments; perform manual checks.
